

Quality Assurance Engineer Job Description

Founded in 2017, TieUp Farming is an ag-tech start-up company based in Melbourne, Australia. After identifying a need for a smooth end-to-end solution for horticultural businesses, we developed a cloud base software that is the first all-encompassing solution for operation workflow management, traceability, cost and data capturing on the farm and the packing shed, providing unparalleled visibility across the production process.

TieUp Farming software is now the leading cloud-based solution for the horticulture industry. We assist farms throughout Australia to become more efficient and sustainable, by digitising and streamlining farming operations and processes.

We have a strong, rapidly growing presence in Australia and, due to this continued growth, we are looking for a new addition to our technology team that shares our passion in solving the most challenging problems in the industry.

The position will require the following qualities

- Proven work experience (4 + years) in software development and/or quality assurance.
- At least a bachelor's degree in computer science or in a related field.
- Strong knowledge of software QA methodologies, tools and processes.
- Experience in writing clear, concise and comprehensive test plans and test cases.
- Experience in release management/understanding the release cycle of product development.
- Experience with SQL.
- Experience with API testing and performance testing.
- Experience in test automation.
- Operational knowledge of Jira.
